Summary

As a young, extremely eager, and fast-paced learner, I am hoping to hone in on coding skills and make an impact in the tech world as a Java Developer. Was previously on a semi-professional sports team at a Mid-American Conference(MAC) University with a full team roster of at least 127 athletes. Transferred from the University of Iowa, where I played BIG 10 football and was accomplishing dreams of receiving a Management degree. I commonly exhibit hard work, while I was in the process of learning responsibilities and calls to ensure the play was executed in the correct fashion. Develops relationships with teammates while establishing a strong trust. With a main focus as a student-athlete at Miami University, I pursued a great education to further my career path and developed a useful skill set. Most recent job was playing for the Detroit Lions as a cornerback in the NFL.

Education

Grand Circus - Java Full-Stack Bootcamp, 2022-2023.

Miami of Ohio University - Bachelor of Science in Kinesiology & Health, 2018-2021.

University of Iowa - Sports and Recreational Management, 2016-2018.

Experience

Grand Circus
- Fitness Center Application (Link)
  - Worked with a team of other Developers to create a well functioning fitness center app to aid in simplicity for a company. **(Utilized object oriented programming, polymorphism, inheritance, data structures)**

Detroit Lions (NFL)
- Professional Football Athlete
  - Worked as a professional football Cornerback/Special Teams player where my roles from college football carried on to a career on the NFL level.
  - Responsible for representing a worldwide known organization, learning how to conduct myself in the mainstream media, and compete at the highest level of athletics.
  - Developed many connections on & off of the field.

Miami of Ohio University
- Worked with a number of different team members in order to help restore a damaged community after a tornado destroyed multiple neighborhoods in the Dayton, Ohio area.
- Pursued a Sports Management Degree. Attended classes, and developed myself to be a well rounded capable person.
- Played football on Division 1 level, where I learned an abundance of teamwork skills and responsibility.

University of Iowa
- Volunteered at a number of community events including helping out at the Salvation Army to distribute food and help with organization around the different locations.
- Pursued a Sports Leadership and management degree, attended classes and developed myself accordingly at a Big 10 university

Technical Skills

- **OOP**	- **Git/GitHub**	- **Javascript**
- **JAVA**	- **SQL/MySQL**	- **HTML/CSS**
